

TECHNICAL DATA SHEET

Eurovent **CLIP C**

Clip for cut roof tiles, made of a stainless steel bracket and steel wire. Suitable for use with many models of interlocking tiles, ensuring quick and easy installation. Effectively secures the tiles against wind uplift. Resistant to weather conditions.

PARAMETER	UNIT	VALUE
Material composition		Stainless steel
Dimensions	[mm x mm x mm]	20 x 30 x 400
Plate thickness	[mm]	1
Wire diameter	[mm]	1
Mechanical strength under perpendicular load	[kN]	0,15
Corrosion resistance of zinc coating in neutral salt spray test	[h]	96
UV resistance		resistant
Color		silver
Carton	[pieces]	25
Pallet	[cartons /pieces]	800 / 20 000

TECHNICAL DATA SHEET

Eurovent CLIP C

Application: It is used for fastening cut roof tiles in roof valleys and hips. It secures the tiles against wind uplift. Installed using the metal bracket part.

Safety: The product is not intended for consumption. Avoid contact with eyes. In case of skin irritation, consult a doctor.

Storage / transport: The product should be stored at room temperature, in its original packaging, in dry, covered rooms free from moisture. Under heavy loads, the product may deform. Therefore, it is recommended not to stack the product with other heavy items (both during transport and storage). The clips should be transported using covered means of transport, secured against damage. During transport, transport safety regulations must be observed. The product must be protected from the effects of chemicals that could reduce its technical properties or cause permanent damage.

The product is covered by a warranty provided that the guidelines contained in the technical data sheet are strictly followed. The manufacturer reserves the right to refuse a complaint if these guidelines are not observed.

Contained information, advice and guidance is given based on our knowledge, researches, experience and in good faith. We are not responsible for the consequences of improper or incorrect use of our products. Each user of this material will ensure in every possible way, including an examination of the final product in the relevant conditions, the suitability of supplied materials to achieve the objectives pursued by him.
