

Eurovent CORNER PRO IN

Eurovent® CORNER PRO IN is a prefabricated, single-layer internal corner made of SEBS material, offering excellent UV resistance and waterproof performance. It is designed for waterproof sealing of complex joints between the window frame and the exterior substrate.

Application: The internal corner is designed for waterproof sealing of complex connections between the window frame and the substrate on the exterior side of corners. It can be used in façade constructions, window installations, and for sealing threshold connections of terraces and balconies, as well as in roofing systems. Depending on installation requirements, the corner can be either bonded or heat-welded.

- High mechanical stability and tear resistance
- Durable sealing of internal structures
- Suitable for Passivhaus and energy-efficient construction
- Ideal for sealing façade construction elements
- Compatible with butyl adhesives
- Suitable for heat-welding
- Designed for sealing window-to-wall connections
- Exceptional resistance to both low and high temperatures and harsh weather conditions

TECHNICAL DATA SHEET

Montage:

- Bonded to provide a mechanical connection between the window frame and the wall.
- Installed using butyl adhesive on aluminium, steel, or wooden structures.
- It should be installed under conditions suitable for standard construction work and must not be applied at temperatures below -15 °C. The product must be adhered to a clean, dry, and grease-free surface prepared for installation.

Safety: The product is not intended for consumption. Avoid contact with eyes. In case of skin irritation, consult a doctor.

Storage / transport: The product must be stored in its original packaging, in dry, covered areas, free from moisture and direct UV radiation. It should be transported using covered vehicles and secured against damage. The product must be protected from exposure to chemicals, especially solvent-based substances, as these may reduce its technical performance or cause permanent damage.

The product is covered by a warranty, provided that all guidelines specified in the technical data sheet are strictly followed. The manufacturer reserves the right to reject warranty claims if these guidelines are not followed.

Contained information, advice and guidance is given based on our knowledge, researches, experience and in good faith. We are not responsible for the consequences of improper or incorrect use of our products. Each user of this material will ensure in every possible way, including an examination of the final product in the relevant conditions, the suitability of supplied materials to achieve the objectives pursued by him.
