

Eurovent CORNER PRO OUT

Eurovent® CORNER PRO OUT is a prefabricated, single-layer external corner made of SEBS material, offering high UV resistance and excellent waterproofing properties. It is designed for waterproof sealing of complex connections between the window frame and the exterior substrate around outer corners.

Application: The external corner is used for waterproof sealing of complex connections between the window frame and the exterior substrate at outer corners. It is suitable for use in façade systems, window installations, and for sealing threshold connections of terraces and balconies, as well as in roofing structures. Depending on installation requirements, the corner can be either bonded or heat-welded.

- High mechanical stability and tear resistance.
- Durable sealing of external structures.
- Suitable for Passivhaus and energy-efficient construction.
- Ideal for sealing façade construction elements.
- Compatible with butyl adhesives.
- Suitable for heat-welding.
- Designed for sealing window-to-wall connections.
- Exceptional resistance to both low and high temperatures and harsh weather conditions.

TECHNICAL DATA SHEET

Montage:

- Bonded to provide a mechanical connection between the window frame and the wall.
- Installed using butyl adhesive on aluminium, steel, or wooden structures.
- It should be installed under conditions suitable for standard construction work and must not be applied at temperatures below -15 °C. The product must be adhered to a clean, dry, and grease-free surface prepared for installation.

Safety: The product is not intended for consumption. Avoid contact with eyes. In case of skin irritation, consult a doctor.

Przechowywanie / transport: The product must be stored at room temperature in dry, covered areas, protected from moisture and direct UV exposure. It should be transported using covered vehicles and properly secured to prevent damage. The product must be protected from exposure to chemicals, especially solvent-based substances, as they may reduce its technical performance or cause permanent damage.

The product is covered by a warranty, provided that all guidelines specified in the technical data sheet are strictly followed. The manufacturer reserves the right to reject warranty claims if these guidelines are not observed.

Contained information, advice and guidance is given based on our knowledge, researches, experience and in good faith. We are not responsible for the consequences of improper or incorrect use of our products. Each user of this material will ensure in every possible way, including an examination of the final product in the relevant conditions, the suitability of supplied materials to achieve the objectives pursued by him.
