

TECHNICAL DATA SHEET

Eurovent **STEP**

Eurovent[®] STEP chimney step made of galvanized steel, used as an element ensuring safe movement on pitched roofs with a slope from 15° to 60°. It features anti-slip embossing across the entire surface and is mounted on the roof in combination with a bracket. Available in several color versions, powder-coated according to the RAL color palette.

PARAMETER	UNIT	VALUE
Material composition		Steel grade S235JR
Dimensions	[mm]	approx. 160 x 250
Construction requirements	[Standard]	EN 516:2007
Coating thickness	[µm]	≥ 60
Anti-slip surface		YES
Corrosion protection		Hot-dip galvanized
Zinc coating thickness	[µm]	≥ 55
Color	[RAL]	brick 8004, brown 8017, brown 8019, anthracite 7016, graphite 7024, black 9005, cherry 3004, chestnut 3009, cherry 3011
Packaging	[pieces]	10

* on request

Eurovent **STEP**

Application: Eurovent[®] STEP chimney step is used as a roof communication element, enabling the chimney sweeper to move safely across the roof surface and around the chimney area. It is mounted on the roof depending on the type of covering, using the appropriate Eurovent[®] SUPPORT bracket. The individual elements are connected with special screws supplied with the products.

Installation: Mounted on the roof covering, depending on the type of roofing, with the appropriate Eurovent[®] SUPPORT bracket. The individual elements are connected with screws. Thanks to its two-piece design, it allows adjustment of the step inclination angle depending on the roof slope.

Safety: The product is not intended for consumption, avoid contact with eyes, and in case of skin irritation consult a doctor.

Storage / transport: The product should be stored at room temperature, in its original packaging, in dry, covered areas free from moisture. Under heavy load, the product may deform, warp, or suffer damage to the galvanized and painted coating. Therefore, it is recommended not to stack the product with other heavy items (both during transport and storage). It should be transported in covered vehicles, secured against damage. During transport, transport safety regulations must be observed. The product must be protected against exposure to chemical agents that could reduce its technical performance or cause permanent damage.

The product is covered by warranty provided that the guidelines contained in the technical data sheet are strictly followed. The manufacturer reserves the right to refuse warranty claims in case of non-compliance with the presented guidelines.

Contained information, advice and guidance is given based on our knowledge, researches, experience and in good faith. We are not responsible for the consequences of improper or incorrect use of our products. Each user of this material will ensure in every possible way, including an examination of the final product in the relevant conditions, the suitability of supplied materials to achieve the objectives pursued by him.
