

TECHNICAL DATA SHEET

Eurovent **ANTIBIRD DUO**

Is a protective element made of a polycarbonate base and flexible steel wires. It is designed to protect roofs, window sills, cornices, and other surfaces of buildings and façades against birds.

PARAMETER	UNIT	VALUE
Base material		Polycarbonate
Spike material		Steel wire
Length	[mm]	A: 360
Width	[mm]	B: 65
Height	[mm]	C: 110
Protection width	[mm]	110
Mounting method		Adhesive, screws, blind rivets, wall plugs
Animal safety		Animal-safe product
Box	[pcs]	120
Pallet	[pcs]	1800

## Eurovent **ANTIBIRD DUO**

**Application:** Designed to protect roofs, façades, cornices, window sills, and other elements of buildings exposed to bird perching, nesting, and contamination. Installation is carried out using multi-purpose adhesives or sealants. Individual modules can be connected together to form a continuous bird protection barrier.

**Assembly / warranty:** For maximum durability and performance, it is recommended to install the module using a mounting adhesive. Before installation, thoroughly clean and degrease the surface, removing dust and dirt. Installation should be performed at temperatures above +5°C. In particularly difficult areas, installation using screws, plugs, or rivets is permitted; however, these methods may cause permanent damage to the substrate. For sloped downpipes or unused balcony railings, plastic ties can be used. Modules should be mounted so that the edge of the module reaches the edge of the protected surface. It is acceptable for the wires to extend beyond the edge of the protected surface.

The product is covered by a warranty, provided that all guidelines specified in the technical data sheet and installation instructions are strictly followed. The manufacturer reserves the right to reject claims resulting from non-compliance with the provided guidelines.

**Safety information:** This product is not intended for consumption. Avoid contact with eyes. In case of skin irritation, consult a physician. Improper handling may cause injury. Exercise caution and install modules out of reach of small children. The product is not harmful to animals and does not injure them – the steel spikes are blunt and flexible, preventing birds from landing but causing only discomfort upon contact.

**Storage / transport:** Store in dry, covered areas protected from moisture and UV radiation, in original, undamaged, sealed packaging. Transport the product using covered vehicles. The product should be packed securely to avoid damage. Comply with transport safety regulations. Protect the product from chemical agents, especially solvent-based substances, which may degrade or permanently damage the material. Handle and transport the product with care – excessive pressure may cause the wires to deform.

*Contained information, advice and guidance is given based on our knowledge, researches, experience and in good faith. We are not responsible for the consequences of improper or incorrect use of our products. Each user of this material will ensure in every possible way, including an examination of the final product in the relevant conditions, the suitability of supplied materials to achieve the objectives pursued by him.*
